

THE MODULAR KIT+ SYSTEM CONSTRUCTION KIT FOR PLAYGROUNDS

TIMBER OR STAINLESS STEEL - AT YOUR CHOICE

THE FLEXIBLE KIT+ SYSTEM FOR ETOLIS®, HARENA AND FRISA

Since 1979, PLAYPARC has been getting people moving and is known as a high-quality manufacturer and design partner for children's play-grounds and outdoor fitness equipment in public spaces.

The most popular playground equipment series **ETOLIS®** (Multiplay 5-12 y.), **HARENA** (Sandplay 1-5 y.), and **FRISIA** (Balancing 3 - 12 y.) out of the big **PLAYPARC** universe are optionally available with posts made of **wood**, **stainless steel** or **powder-coated stainless steel** and can be extended with the other modules of the **KIT+** system.

Whether an attached **LUUPZ®** carousel, **sand** and **water** play equipment or other **play modules**, they can all be individually combined with all elements of the **KIT+** system.

This is how preconfigured playground equipment and complete play areas are created. Many years of knowledge about play and movement went into the new **KIT+** system and makes attractive play-ground design very easy.

THE MODULAR KIT+ SYSTEM CONSTRUCTION KIT FOR PLAYGROUNDS

KIT+ construction kit with a lot of modules

Everything fits together and can be combined with each other in the modular KIT+ system. Design, size and range of features can be configured according to the customer's needs, budget and other specifications. The solid posts are available in three versions and offer a great flexibility to design an individual playground.

STAINLESS STEEL
POWDER COATED

Colors of the powder-coated posts

We have defined PLAYPARCs RALstandard colours. Upon request other RAL colours are possible and can of course be ordered individually.

- RAL5015
- RAL1016
- RAL6017
- RAL2011
- RAL3002
- RAL9017

THE MODULAR KIT+ SYSTEM CONSTRUCTION KIT FOR PLAYGROUNDS

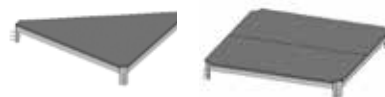

The KIT+ modules are durable, sustainable and solid. The floor panels are available in two shapes and can be positioned in height intervals of 30 cm.

FLOORS

Nubby HPL, stainless steel frame

- Triangled floor
- Squared floor

PLAY TABLES

HPL, stainless steel frame and inserts
e.g. mud bowls, sieve, crane etc.

Additional value with imprinted barriers

Themed designs on the barriers and walls inspire play and movement, children's creativity and identification with the play space. Pirate's lair, chicken house or knight's castle - everything is possible!
